PROJECTS

Airline Reservation System | Spring Boot + React.js + MySQL

- Developed a full-stack airline reservation system using Spring Boot, React.js, and MySQL.
- Implemented JWT-based authentication with refresh-token support and role-based, method-level authorization using Spring Security.
- Built REST APIs for 6 core modules: flight, airport, passenger, booking, payment, and ticket management.
- Implemented database operations and entity relationships using Spring Data JPA/Hibernate and Spring JDBC.
- Added global exception handling for consistent API error responses and integrated Swagger/OpenAPI for API documentation and testing.
- Developed the React.js frontend with React Router and Axios for backend API integration.
